

Fahad Ali

Summary

Software Engineer with 3+ years of experience building data pipelines and deploying scalable AI. Stanford and DeepLearning.AI certified. Delivered 20+ automated solutions and engineered complex architectures utilizing RAG, Reinforcement Learning, and open-source models.

Work Experience

Freelance Python Developer & Data Engineer | Remote

2022 - Present

- Designed and deployed AI agents that automated complex tasks, client communications, and sales pipelines.
- Engineered 20+ robust data ingestion pipelines and integration solutions for global clients, facilitating large-scale data collection and preparation.
- Architected backend ETL (Extract, Transform, Load) processes and Flask applications to process and clean 10,000+ daily records into MySQL/PostgreSQL databases.
- Reduced manual workloads by 80% through intelligent automation tools.

Projects

Academia.ai | Python, RAG, Google Gemini, Full-Stack

- Architected course-specific AI chatbots utilizing a Retrieval-Augmented Generation (RAG) pipeline and the Gemini API, enabling students to accurately query localized course materials.
- Engineered an intelligent exam portal that dynamically generates assessments and automates performance reporting, significantly reducing manual grading and administrative effort for educators.

AI Sales Calling Agent | Python, Local LLMs, NLP

- Architected an autonomous AI sales agent utilizing local open-source models to handle real-time conversational capabilities and complex client workflows.
- Engineered advanced intent detection mechanisms and state management to guide conversation flow and dynamically respond to user inputs.

Adaptive Learning | Reinforcement Learning, Python, Docker

- Developed a Reinforcement Learning-based programming platform that dynamically adjusts curriculum pacing and difficulty based on user performance and behavior.
- Built and integrated a custom Docker container for Judge0 to serve as a secure, scalable compiler API for real-time code execution and evaluation.

Certifications

- Machine Learning Specialization – Stanford University & DeepLearning.AI (2024).
- Google Data Analytics Professional Certificate – Google (2025).
- Python for Data Science, AI & Development – IBM (2025).
- Python Data Structures – University of Michigan (2025).
- AI For Everyone – DeepLearning.AI (2024).
- Microsoft AI & ML Engineering Professional Certificate – Microsoft (In Progress).

Skills

Technical Skills

- Machine Learning & AI:** Natural Language Processing (NLP), Retrieval-Augmented Generation (RAG), Reinforcement Learning, Generative AI (Local LLMs, Gemini API), Intent Detection, TensorFlow, scikit-learn, Pandas, NumPy.
- Programming Languages:** Python, C#, C++, JavaScript, TypeScript.
- Data Engineering & Backend:** ETL Pipelines, Data Ingestion (Playwright, Selenium, BeautifulSoup), Flask, REST APIs, .NET.
- Databases:** PostgreSQL, MySQL, MongoDB, SQLite, Supabase.
- Frontend Development:** Next.js, React.

Tools

- MLOps & Deployment:** Docker (Custom Containerization), Linux environments (Ubuntu, Fedora, Arch Linux).
- Version Control:** Git, GitHub.
- Development Environments:** VS Code, Jupyter Environments.

Educational Background

Bachelor's in Computer Science

National Textile University, Faisalabad
Oct 2022 - Present
Relevant coursework: Data Structures, Algorithms, Database Systems, Machine Learning.

Additional Information

- Contributed to projects on GitHub with 40+ repositories.
- Volunteer mentor for junior developers in local coding communities.
- Featured project showcases on personal portfolio website.
